

Results from the questionnaire for the first meeting in Belgium

Before and after our first Mobility-Meeting in Veurne, Belgium, every student had to answer questions in an online questionnaire, created by the German team. The questions were about Belgium in general, the European Parliament and about food - the topic of this meeting. Some questions referred to the knowledge of the students, some to their habits and experience.

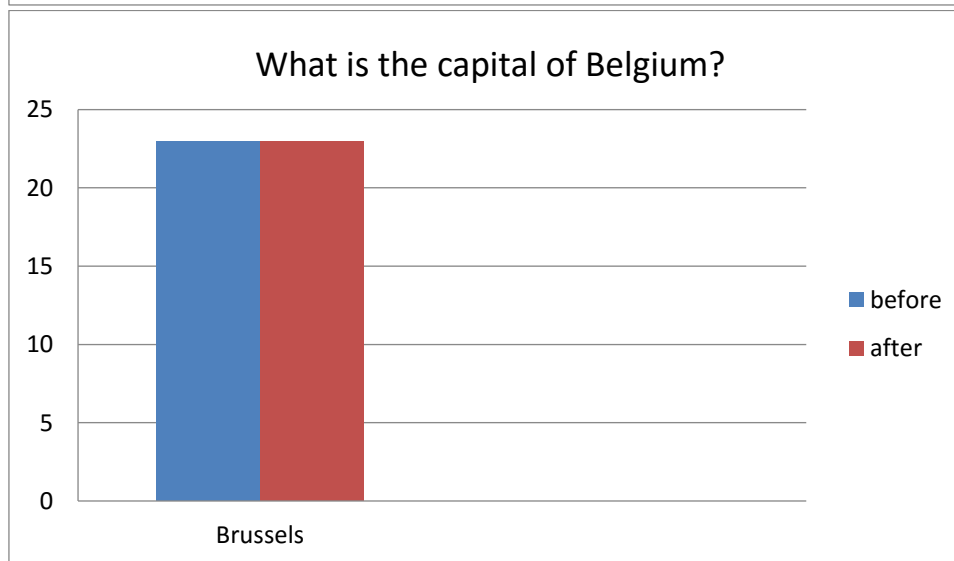

This way we were able to find out, what the students already knew about the country they travelled to and about the topic.

With the help of the bar graphs, which show the results before and after the meeting, we are able to figure out, if any changes can be observed after the meeting.

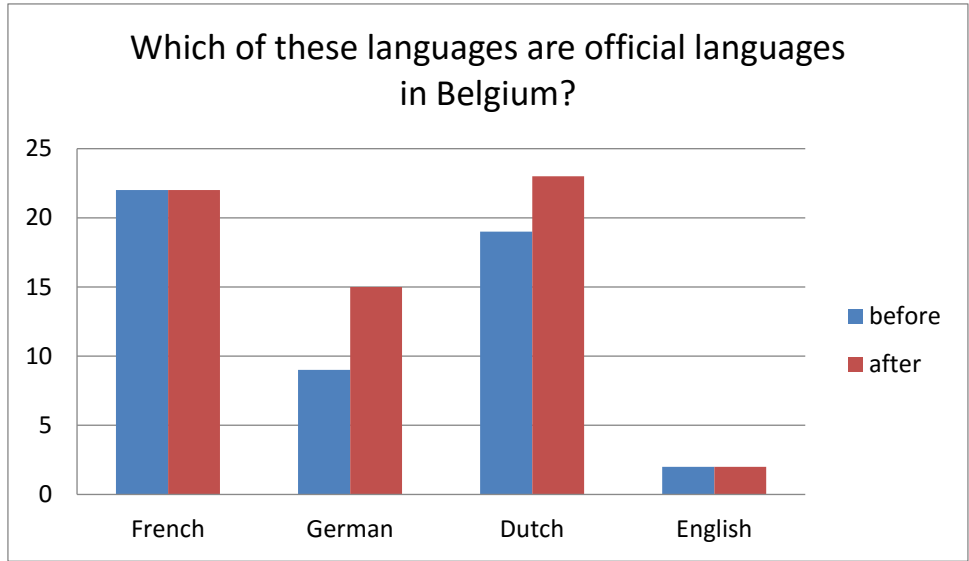

1. Questions about Belgium

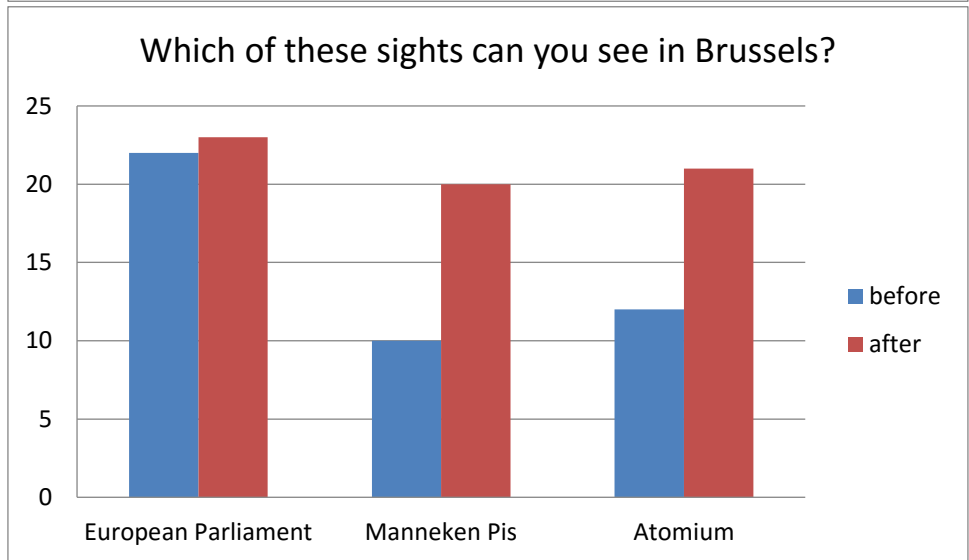

Correct answer:
Waffles and mussels

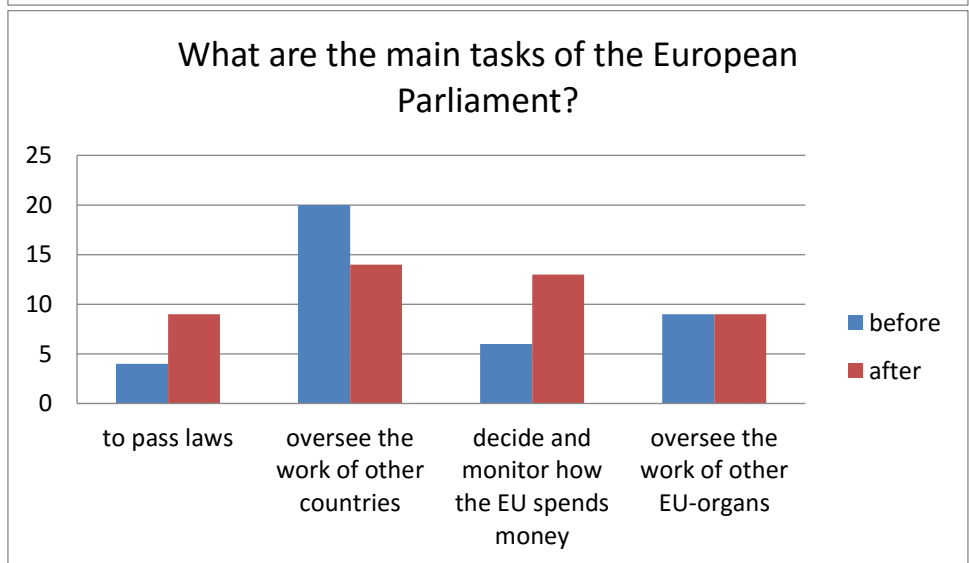

Correct answer:
Brussels
