The visit to the recycle planet was difficult for the pupils. The excersis to find the perfect place to build an incinerator was difficult, the pupils didn't get the total picture of the excersise.

We think there wasn't enough information for the pupils, and the GIS activity was really difficult and the software was in German

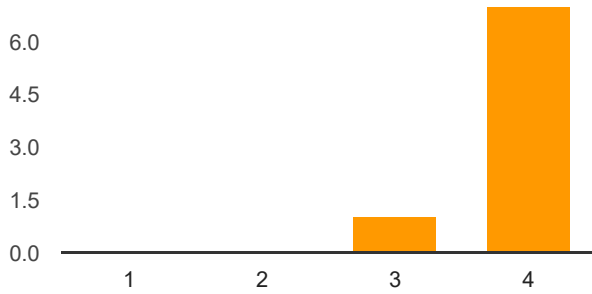

The visit of the recycling plant was difficult to understand for the students.

## How could the meeting be more successful to you?

The German students should have participated in all activities. The trip to Cologne-Bonn was too long.

Visiting Bonn and Köln on one day was very busy. One city would have been enough.

We had to give more explanation about some activities to make them more aware about the subject to reduce waste.

I will add an extra value for teachers like exchanging teachers/teams during the mobility.

Also, having an opportunity to talk to lectures (i.e. km-0). I missed more opportunities to share experiences during lunch/dinner with the German teachers.

A better organization the days we visited some cities.

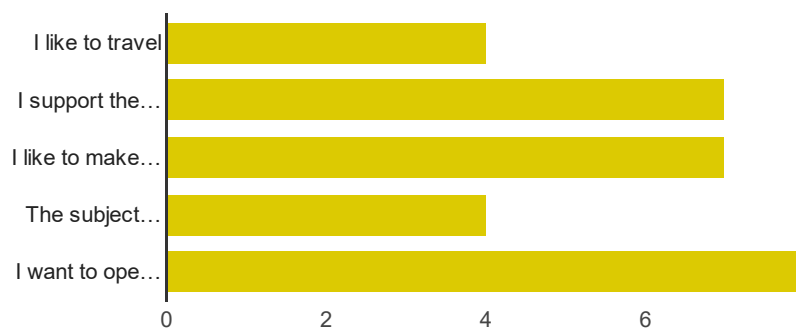

It would be easier for us if we didn't have any classes to teach during the week. On the other hand it was good to have a day off on Thursday to have more energy for Friday.

less stress but that is not possible...

The places we visit were far away from Brakel and there was not much time for a constructive visit.
